

- 1) Air 1 is my local radio station. It serves me with up to date information and uplifting music that I can't find anywhere else on the dial.
- 2) Because Air 1 is a multi-point station it is able to provide me with family-friendly, commercial free music that everyone can enjoy. I know that a local LPFM station would not be able to provide the same service (I've seen too many go under in almost every other market I lived in) and as such I would lose the only station in the market that represents my beliefs and ideas.
3. The service provided by Air 1 in Las Vegas (and Barstow, Riverside and many other places in this area that I travel) is critical because it is unique in its market. My entire family enjoys it, I never have to worry about it having an FCC violation for poor language, behavior, etc, and its commercial free. This means it is supported by me the listener (I donate to them every month). I can't say the same for NPR. It helps me to build a positive environment for my family which just isn't possible with any of the other stations in my local area.

Thanks.
Tom
